# Digital Peristaltic Pump

MU-D peristaltic pump series is ideal for a variety of applications, which include filtration, circulation, sampling, chemical spraying, dispensing transferring, feeding and filling. The easy-to-use pump design allows for several different silicon tubing sizes to be fitted. This gives the user a wider variety of flow rates. The MU-D series is also reversible providing better convenience and flexibility to the user. The digital control provides high accurate rpm performance.

MU-D01 pump is a digital controlled mode with a solid 50W brushless motor, and MU-D02 is designed with a higher horsepower, 100W for higher volume demands required.
