

Complete Mini / Mini Wide / Maxi Electrophoresis & Blotting System

Complete Mini / Mini Wide / Maxi Electrophoresis & Blotting System

The Complete Electrophoresis Systems include both modules for Gel Electrophoresis and Electroblotting and accessories, to provide a complete Mini, Mini Wide or Maxi gel casting, running and electroblotting system. The electroblotting module includes three inter-locking cassettes and six fiber pads.

A high intensity current is generated by coiled platinum electrodes. These in conjunction with the advanced cooling features allow rapid electroblotting in as little as one hour.

Features

- >Versatile: Interchangeable modules for slab gel and Electroblotting using a single universal buffer tank
- >Hinged Cassettes
- >High intensity electrodes
- >3 blot capacity
- >Rapid set-up cooling
