Peak of perfection

eppendorf

A generation of tips to set standards

Eppendorf Totally Integrated Pipetting System

A pipette is only as good as its tip

Only a perfectly manufactured pipette tip can ensure that the precision of a modern pipette is maximized. Our epT.I.P.S.—Eppendorf *Totally Integrated Pipetting System*—have been developed to work in perfect combination with our pipettes. The results are reduced-force tip attachment and ejection with complete sealing. Additionally, the universal nose cone design allows the tips to be used with pipettes from other manufacturers.

As we have our own production facilities, we can maintain the highest standards in the selection and processing of plastic materials. Ideal wetting properties, high transparency and special certified purity levels are the visible expression of this production philosophy.

Production without compromise

Having our own production facility means that each one of our epT.I.P.S. is manufactured to the highest quality standards. Through our selection of the best plastic materials and ISO 9001-certified production processes, our tips maintain ideal wetting properties and boast high transparency and certified purity levels.

Every tip is manufactured to match specifically to its respective Eppendorf® pipette(s), thus ensuring the maximum precision and reliability you have come to expect and rely on.

The Eppendorf pipette and tip system satisfies all of the requirements of EN ISO 8655 standards.

Tip-top design!

- Drop-contour design gives all Eppendorf tips a uniform look
- Soft, flexible tip cone ensures better pipette tip sealing
- Ergonomically optimized cone geometry ensures perfect fit on Eppendorf pipettes
- Universal fit—can be used with pipettes from other manufacturers

Eppendorf pipette tips – an investment in quality

Eppendorf Totally Integrated Pipetting System

The contamination-free refill system

The epT.I.P.S. refill system consists of the reusable, fully auto-clavable epT.I.P.S. box and the “epT.I.P.S. Reloads” refill trays. This system offers the easiest possible handling in a space-saving and environmentally friendly package. All components are 100% recyclable, which greatly reduces overall waste as compared with conventional tips packages.

Product features

- Contamination-free handling of the refill tray—plastic lids protect refill trays from direct contact during transfer to the reusable box (see next page)
- Stable, sturdy box design is ideal for working with multichannel pipettes
- Reloads can be autoclaved in their packaging and stored for future use—reducing the need for multiple refill boxes
- Color-coded tray for easy volume identification and matching to respective Eppendorf® pipette
- Reloads available in two purity levels:
 - Eppendorf Quality
 - PCR clean—free of human DNA, DNase, RNase and PCR inhibitors (see page 5)
- IVD conformity

- Fine graduations make it easy to visually check the volume pipetted
- Available in three purity levels: Eppendorf Quality, PCR clean and Eppendorf Biopur
- New tip design for better access to a wider variety of tubes and wells
- Finely tapered and extended for working with small volumes

epT.I.P.S. Standard

- Original, high-quality Eppendorf pipette tips at an attractive price
- Packaged in resealable bags
- Available in sizes from 10 µl to 10 ml
- 200 µl, 300 µl and 1,000 µl tips are color-coded yellow and blue, respectively

ep Dualfilter T.I.P.S.

sterile & pyrogen free

- Two filter layers provide dual protection for pipette and sample
- Two filter layers provide dual protection from aerosols and biomolecules
- Free from PCR inhibitor additives
- Patent-pending technology
- All tips are provided sterile, Eppendorf PCR clean and pyrogen-free
- Ivd Conformity
- Batch certified

epT.I.P.S. Racks

- Eppendorf Biopur pipette tips provide maximum biological purity (guaranteed sterile, RNase-, DNA-, ATP- and pyrogen-free, see page 5), which satisfies the most stringent demands in the medical, pharmaceutical and food research industries, as well as in molecular biology and cell technology applications.
- Continuous control of each batch by an independent laboratory
 - Batch-related certificates available on request, or go to www.eppendorf.com
- Packaged in racks of 96, 48 or 24 tips, depending on tip volume

epT.I.P.S. Set

- Starter kits consist of the epTIPS Box and 5 refill trays

epT.I.P.S. Box

User-friendly:

- Contamination-free transfer of trays to the working box
- System optimized for use with multichannel pipettes
- Color-coded trays for simple identification of tips and matching Eppendorf® pipette
- Tips can be attached to the pipette from the refill trays
- Refill trays are entirely autoclavable for future use
- Space-saving packaging

epT.I.P.S. Reloads

Environmentally friendly:

- All components are 100% recyclable
- Reduced waste as compared with disposable racks
- The refill system, depending on tip size, is packaged as either dual-sided or in stack form
- Reloads are available in two purity levels: Eppendorf Quality and PCR clean

epT.I.P.S. Singles

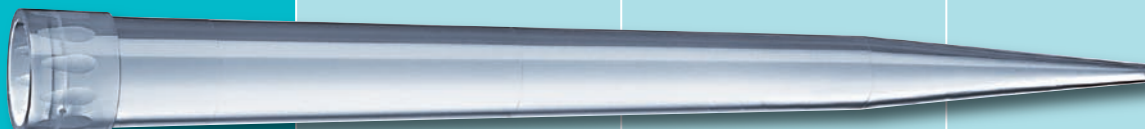

- Individually wrapped pipette tips in Eppendorf Biopur: guaranteed sterile, RNase-, DNA-, ATP- and pyrogen-free
- Batch number and expiration date printed on each blister pack
- Continuous quality control of each batch by an independent laboratory
 - Batch-specific purity certificates available upon request, or go to www.eppendorf.com

How can you recognize original Eppendorf® pipette tips?

A new, unique feature of our tips is the “ring” of drop-shaped relief elements circling the crown. Additionally, each tip (and tube) is embossed with “Eppendorf” on its rim.
